

Catherine Batsoula

NYC | 917-952-1193 | cbatsoula@gmail.com | [Github](#) | [Medium](#) | [website](#) | [LinkedIn](#)

Full stack web developer with 4 years experience in the service industry with a passion for designing projects and coding. Leveraging experience in Ruby on Rails, JavaScript, React and a background in catering, I know how to work on a team under pressure to deliver a successful end result. I bring strong skills in team-building and project management to help drive the project to completion. I am excited to build and maintain web applications that will be used by everyday people navigating through the uncertain waters of life. I discovered coding through meeting new people who encouraged me to take the leap into programming.

Technical Projects

WavesOn - [Github - client](#) | [Github – API](#) | [Demo](#)

- Marine weather and journal web app to allow users to check hourly weather at favorite and nearby (with a radius of roughly 13 miles) beach locations. Users can document their experience at that beach by writing notes and uploading a photo to look back at that moment.
- Utilized Ruby on Rails, React.js, and Custom CSS. Uses Google Products (Places API, Geolocation API, Geocoding API, Maps Javascript API) and World Wide Weather Marine API to grab the user's location, return beach locations along with location weather, and Cloudinary to upload and manage photos.

SKINN - [Github](#) | [Demo](#)

- 10 step skincare customizer with review functionality to help women find their top performing natural products.
- Used Ruby on Rails, React.js, and Custom CSS. Uses a seeded database of natural products.

explore - [Github](#)

- Explore our solar system using NASA's photo of the day, and Le Systeme Solaire API for pulling data on our neighboring celestial objects.
- Leveraged React.js and Semantic-UI-React.

Card Game - [Github - client](#) | [Github - API](#) | [Demo](#)

- Fun memory game, created to match cards with the same programming language logo to earn points.
 - Made with Ruby on Rails, and Javascript.
-
